🇮🇳 Indian Citizen (Willing to relocate) 🔗 [linkedin.com/in/ravi-sharma-740674117](https://www.linkedin.com/in/ravi-sharma-740674117)

📄 PROFESSIONAL SUMMARY

Software Engineer with over 8 years of professional experience, including 4+ years dedicated to DevOps, Cloud Infrastructure, and automation. Proven track record in designing and optimizing enterprise-grade CI/CD pipelines, managing containerized infrastructure across multi-node environments, and implementing high-performance monitoring stacks. Adept at bridging the gap between backend development and scalable cloud operations within global R&D environments.

🧠 TECHNICAL SKILLS

Core Development: Python (Advanced), SQL, NoSQL, RESTful API Design.

Cloud & Infrastructure: AWS (Associate Architect), GCP, Docker, Azure, Kubernetes, Infrastructure as Code (Terraform)

DevOps & Automation: CI/CD Pipeline Development, Automated Testing, Infrastructure Automation, GitHub Actions

Observability: Prometheus, Grafana, System Health Trackers, Telemetry Pipelines

Workflow Orchestration: Apache Airflow, Task Scheduling, Distributed Data Pipelines

🌐 CERTIFICATIONS & LANGUAGES

AWS Certified Solutions Architect – Associate: (2021 – 2024)

English: Full Professional Proficiency

Hindi: Native Proficiency

🎓 EDUCATION

Silicon Institute of Technology, BBSR,
Bachelors in Electrical and Electronics Engineering

📁 PROFESSIONAL EXPERIENCE

STAFF ENGINEER, R&D ENGINEERING, *Synopsys Inc.*

05/2026 – Present

- Lead the design and integration of central, reusable technology components and workflows to standardize global software delivery.
- Standardize, optimize, and scale enterprise-grade CI/CD pipelines to accelerate deployment lifecycles and improve engineering velocity.

SENIOR ENGINEER, R&D ENGINEERING, *Synopsys Inc.*

07/2025 – 04/2026

- Maintained and integrated containerized solutions across multi-node cluster environments, ensuring high availability and system resilience.
- Developed shared components, automated pipelines, and comprehensive technical documentation to streamline system maintenance and scalability.

R&D ENGINEER II, *Ansys Inc.*

01/2023 – 07/2025

- Supported the deployment of web applications using container technologies for high-availability environments.
- Developed backend services and APIs to facilitate data exchange between web interfaces and internal compute engines.
- Collaborated with global stakeholders to refine technical specifications for engineering products.

SOFTWARE ENGINEER II, *Ansys Inc.*

08/2021 – 12/2022

- Developed full-stack web solutions utilizing Python APIs and internal frameworks to solve complex simulation and engineering challenges.
- Integrated flagship engineering products into web-based platforms, significantly increasing software accessibility and utility.
- Translated highly technical simulation workflows into functional, automated web-based developer tools.

SENIOR SYSTEMS ENGINEER, *Infosys Limited*

07/2020 – 08/2021

- Built automated data migration pipelines and managed ML workflows using Airflow.
- Monitored system health by setting up services with Prometheus and Grafana.

SYSTEMS ENGINEER, *Infosys Limited*

05/2018 – 07/2020

- Developed and deployed containerized Python applications via Flask APIs on Google Cloud Platform.
- Built specialized data processing modules for NLP and OCR automation tasks.
- Contributed to the development of web-based features using Angular.
